DIGITAL SERVICES FOR PUBLIC AGENCIES

One partner for your agency's whole digital side.

From a single accessible form to a full platform rebuild: custom solutions, not templates, and one accountable contact throughout.

✓ Fresh perspective ✓ Zero disruption

SAMPLE SITE demo.pagesteady.com ↗

A fictional village showing our platform at work. Your agency, whatever its size, gets its own design.

ADA TITLE II Web accessibility deadlines

April 26, 2027
State and local governments serving 50,000 or more people

April 26, 2028
Smaller governments and all special districts

We test against WCAG 2.2 AA, which includes the 2.1 AA criteria the rule requires. No overlay widgets: they leave the underlying code unfixed.

What we take on

Pick one piece or hand us the whole thing

Websites
New sites, redesigns, migrations, multilingual sites.

Accessibility
Audits and fixes against WCAG 2.2 AA, accessible PDFs.

Staff editing
Staff post agendas, notices and alerts themselves.

Resident services
Online payments, request forms, meeting video, alerts.

Custom applications
Web and mobile apps, intranets and staff portals.

AI-assisted tools
Site Q&A, rewrites and translations, all staff-reviewed.

Hosting and care
Cloudflare hosting, security updates, domain, DNS, email.

Outreach and search
Newsletters, social, Google and Meta ads, analytics.

Content and creative
Copywriting, branding, print design, photo and video.

Don't see it here? Ask anyway.

If it runs on a screen, we can likely build it: an intranet, records search, booking system or public dashboard. Bring us the problem.

Storm Barnicle, Owner · (440) 766-0979 · contracts@pagesteady.com · pagesteady.com

Small fix or full rebuild. Same care either way.

ONE-TIME FIX → LONG-TERM PARTNER

QUICK FIX	FOCUSED PROJECT	FULL BUILD	ONGOING CARE
Accessible PDFs	Accessibility audit	New site or migration	Hosting and security
Payment or request form	New department section	Intranet or staff portal	Accessibility scans
Emergency alert signup	Outreach campaign	Editor and staff training	Content updates

BUILT FOR Cities and villages · Townships · Counties · State agencies · Libraries · School districts · Special districts · Parks and recreation · Utilities and transit

How a project runs

1. **Discovery.** We learn your residents, services and constraints.
2. **Rough draft.** You see the direction early and steer it.
3. **Build.** You review it all on a private preview link.
4. **Launch.** Zero disruption to your site and operations.

On time and within budget on every project to date.

What your agency keeps

- Your content, data and domain. They stay yours.
- A perpetual license to your site's code, plus a full copy at handoff.
- The option to run your site in a Cloudflare account you own.
- One accountable contact, from the first call on.

Why agencies choose us

Past performance and references on request

Custom
solutions, not templates
Each site is designed around your residents, services and records.

Zero
disruption to your operations
Your current site keeps running while the new one is built and reviewed.

Fresh
perspective, current technology
Fast, secure, accessible sites built with today's tools.

FREE SELF-CHECK · ABOUT 10 MINUTES

Is your website ready for the ADA deadline?

No technical skills needed. Open your homepage and a recent meeting agenda, then work through the list. Every "no" is worth fixing before your deadline.

- [ ] **Free automated scan**
  Paste your homepage address into the free WAVE checker at wave.webaim.org. Red icons are errors: missing image text, low contrast, unlabeled fields.
- [ ] **Text contrast**
  Look for light gray text on white, or text over photos. If it's hard to read on a phone outdoors, it likely fails contrast.
- [ ] **Agenda PDFs**
  Open your newest agenda or minutes PDF and try to highlight a sentence. If you can't, it's a scanned image screen readers can't read.
- [ ] **Forms**
  Open a contact or request form. Does every field keep a visible label while you type, and do errors say how to fix them?
- [ ] **Flyers and graphics**
  When an event flyer or map is posted as an image, are the key details (what, when, where) also written out as text?
- [ ] **Link wording**
  Scan for links that only say "click here" or "read more." Each link should make clear where it goes.
- [ ] **Keyboard only**
  Put the mouse aside and press Tab from the top of your homepage. Can you reach every link and button, and always see where you are?
- [ ] **Outside vendors**
  Payment portals, agenda systems and forms you link to count as well. Has each vendor told you in writing that it meets WCAG 2.1 AA?
- [ ] **Meeting video captions**
  Play a recorded meeting. Can you turn on captions, and are they accurate rather than raw auto-captions full of errors?
- [ ] **An accessibility page**
  Is there a page telling residents how to report a barrier or ask for a document in another format, and who responds?

A quick screen, not a full audit. A site can pass every item here and still have barriers, but a "no" on any item usually means work to do.

WHICH DEADLINE IS YOURS?

April 26, 2027
Governments serving 50,000 or more people

April 26, 2028
Smaller governments and all special districts

FOR YOUR NEXT WEBSITE RFP

10 questions worth asking any website vendor

Copy, share or adapt them freely for any procurement. Clear answers separate a site your agency owns and can keep accessible from one you're locked into.

01 Who owns the content, data, domain and source code, and what do we get if the contract ends?
Keeps you from being locked into one vendor.

02 Which accessibility standard do you test against, and how: automated scans, keyboard, screen reader?
The rule names WCAG 2.1 AA. Ask for methods, not just a “compliant” claim.

03 Do you use an accessibility overlay or toolbar widget?
Overlays sit on top of a site and leave the underlying code unfixed.

04 After launch, how are accessibility problems found and fixed, and how fast?
Every new agenda and post can bring new issues.

05 Can our staff post agendas, notices and alerts themselves? What training is included?
Posting a meeting notice shouldn't need a support ticket.

06 How will existing pages and documents, including PDFs, be moved and made accessible?
Older PDFs are a common gap on public sites.

07 What do hosting and maintenance include: security updates, backups, monitoring, response times?
Get it in writing before something breaks.

08 What is the total cost over three to five years, including hosting, licenses and support?
The build price is only part of what you'll pay.

09 Who is our day-to-day contact, and who actually does the work?
Know whether your project gets handed to subcontractors.

10 Can you show a live site you built and let us try its staff editor?
A hands-on demo shows more than screenshots.

Want our answers to all ten?

They're published at pagesteady.com/government/rfp-questions. We're also glad to give you a hands-on look at our staff editor.
